

Vaggelis Magonezos

Full Stack Software Developer with a focus in developing end-to-end integrated systems with user-friendly and responsive interfaces

RELEVANT EXPERIENCE

Getaways Greece, Athens Greece

Software Developer/Operations Management March 2021 – Present

At Getaways, I manage diverse responsibilities, including operational work, networking, developing in-house software, managing merchant accounts, negotiating partnerships, maintaining the company's website and handling training and recruiting.

SELECTED PROJECTS

* More details and links available in my [website](#)

1. Getaways Suite

A suite of integrated in-house operational resource management solutions that automate and optimize resource allocation for daily tasks. It ensures efficient planning, coordination, and real-time support for operational activities to meet business needs, consisting of the following applications ↴

- [Getaways Management](#) 🔗

Operations Management System which acts as the central hub of the Getaways Suite ERP, managing bookings, fleet tracking, staff schedules, analytics, user management, and automation tools.

- [Getaways Management Mobile App](#) 🔗

A mobile app that offers personalized schedule and task assignments to the company's external staff, deployed in Play Store and IOS App Store.

- [Getaways Booking Portal](#) 🔗

The Getaways Booking Portal provides clients with activity info, live vehicle tracking, booking options, reviews, and office communication. It also promotes partner products on the client feed.

2. HH E-Tickets Availability Tool 🔗

This tool assists travel agents in checking the availability calendar of time slots at all Greek archaeological sites, helping them to plan scheduled visits for their clients

3. TheFreeWallet 🔗

This is a lightweight budgeting web app, set up as a PWA and designed for budget planning and tracking of personal or household income and expenses
